

Evolve Cellular, Inc.
E911 Location Accuracy Progress Report for January 18, 2019
PS Docket No. 07-114

1. Evolve Cellular Inc.'s core and radio network has the ability to, and would, make available to PSAPs uncompensated barometric data for any 911 call placed from any handset that has the capability to deliver barometric sensor data. Evolve Cellular, Inc. is a small, non-nationwide rural provider that operates on an LTE basis only (with no 3G fallback), however, continues to have difficulty locating affordable handsets that support VoLTE-only service and in particular those that can support delivery and reporting of sufficiently accurate location information to our network. Evolve Cellular, Inc. continues to work with its vendors and intends to solve this technical and operational barrier as soon as possible by arranging a purchase of a quantity of compliant handsets when they are available at a price that is within the limits of prudent financial decisions.

2. Evolve Cellular, Inc. has made progress toward meeting its indoor location accuracy implementation plan. Evolve Cellular, Inc. has ensured that its core and radio network is positioned to capture and deliver a 911 caller's location in a manner consistent with all applicable regulations and requirements, if it can be received from a compliant handset. Evolve Cellular, Inc., as a small, non-nationwide rural provider that operates on an LTE basis only (with no 3G fallback), however, continues to have difficulty locating affordable handsets that support VoLTE-only service and in particular those that can support delivery and reporting of sufficiently accurate location information to our network. Evolve Cellular, Inc. continues to work with its vendors and intends to solve this technical and operational barrier as soon as possible by arranging a purchase of a quantity of compliant handsets when they are available at a price that is within the limits of prudent financial decisions.

A handwritten signature in black ink, reading "Lowell Feldman".
